Education

Addis Ababa University — Addis Ababa, Ethiopia
BSc in Computer Science — *2022 – 2026*

Dessie Special Boarding School — Dessie, Ethiopia
High School — *2017 – 2022*

Experience

Software Developer (Contract) — April 2026 – July 2026
Mevinai PLC — *Addis Ababa, Ethiopia*

- Maintained and improved an ERP-based POS system using ERPNext and Frappe Framework
- Fixed critical bugs, implemented new features, and optimized system performance
- Collaborated with the team on system architecture and development using agile methodology

Cybersecurity Intern — 2025
INSA (Information Network Security Administration) — *Addis Ababa, Ethiopia*

- Gained hands-on experience in cybersecurity fundamentals, network security, and system protection
- Developed a programmable SDN firewall and routing automation system as the final internship project
- Collaborated with security professionals to understand threat analysis and secure architecture practices

Freelance & Academic Developer — September 2025 – June 2026
Various Projects — *Addis Ababa, Ethiopia*

- Built production web applications and automation bots for clients and university projects
- Managed full development lifecycle, including database design, API integration, and deployment

Projects

Addis Ababa University Journal System (SINET) | *Node.js, Express, TypeScript, PostgreSQL*

- Built the backend architecture for a live production system used by researchers and academics at sinet.aau.edu.et
- Designed the PostgreSQL database schema and built RESTful APIs for manuscript submission, review workflows, and authentication
- Implemented role-based access control for four user roles (Author, Reviewer, Editor, Admin) and optimized SQL queries for performance

Mini Dev-Centric Browser | *Electron, React, Vite, JavaScript*

- Developed a developer-focused desktop browser integrating dev tools directly into the browsing experience
- Built a multi-panel workspace featuring a Console, Network, Device Sim, Git, API Tester, and AI Assistant
- Engineered the desktop app using Electron for the main process and React + Vite for a fast, responsive renderer UI

AfroAddis Corporate Website | *Next.js, React, TypeScript, TailwindCSS*

- Built a modern corporate website for KYT Trading (live at afroaddis.com)
- Used Next.js App Router for optimized routing and server-side rendering, with TailwindCSS for responsive design

Telegram Mini App & Admin Control Panel | *Next.js, Node.js, TypeScript, PostgreSQL, Railway*

- Developed a full Telegram mini app with a web-based admin control panel, deployed on Railway
- Implemented user registration with admin approval, automated notifications, and interactive menus

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL
Frameworks & Libraries: React, Next.js, Node.js, Express, NestJS, Vue.js, Django, TailwindCSS, Electron, Vite
Developer Tools & Security: Git, Docker, Linux, Railway, PostgreSQL, Firebase, Firewall Configuration, Network Security
