summary

Computer Science graduate (Addis Ababa University) and INSA-trained cybersecurity enthusiast with hands-on experience from the CyberShield Showdown CTF 2025. Full-stack developer proficient in Node.js, React, Vue.js, Next.js, Python, and PostgreSQL Express. Combines pentesting mindset with AI-driven development to build secure, scalable, and production-ready applications. Driven by automation, clean code, and resilient system design

Education

high school, *dessie special boarding school* 2017 – 2022
dessie Ethiopia

bachelor degree of computer science, *Addis Ababa University* 2022 – 2026
Addis Ababa Ethiopia

projects for clients

Backend Developer (Team Project) -Addis Ababa University Journal Management System 📄

Designed and developed the backend architecture and database schema for a production-ready journal management system for Addis Ababa University.

My Contributions:

- Designed PostgreSQL database schema for journals, authors, reviewers, and submissions
- Built RESTful APIs with Node.js + Express for manuscript submission, review workflows, and authentication
- Implemented role-based access control (Author, Reviewer, Editor, Admin)
- Optimized database queries for performance and data integrity
- Collaborated with frontend developers to ensure seamless API integration

Software Developer (Contract) Mevinai PLC (April 2026 – July 2026) contract

- Maintained and improved ERP-based POS system using ERPNext and Frappe Framework
- Fixed bugs, implemented new features, and optimized system performance
- Submitted and merged 105 pull requests
- Worked with team members on system architecture and development using **agile methodology**

Tech Stack: Frappe Framework, ERPNext, Python, JavaScript

Software-Defined Networking (SDN) Firewall & Routing Automation System INSA Final Project | Python, Linux iptables, Docker, REST API | *2025* 📄

Built a programmable SDN solution with Python and Linux iptables that automates firewall and routing rules. Designed REST APIs for controller-device communication and containerized the system with Docker for easy deployment. Improved network management efficiency and reduced manual configuration errors

Telegram Mini App & Admin Control Panel - Melatech

Developed a full Telegram mini app and bot system with a web-based admin control panel, built using **Node.js, Next.js, and PostgreSQL ,typescript**, and deployed on **Railway**.The system includes automated messages and notifications, interactive menus and buttons, user registration with admin approval.

AfroAddis corporate Website for KYT Trading Pvt. Ltd.

Next.js, React 19, TypeScript, TailwindCSS v4, Lucide

- Developed a modern corporate website for KYT Trading Pvt. Ltd., showcasing coffee, sesame, pulses exports/imports, and furniture manufacturing divisions
- Built with **Next.js App Router** for optimized routing and server-side rendering
- Used **React 19** and **TypeScript** for type-safe, maintainable component development
- Styled with **TailwindCSS v4** for responsive, utility-first design across all devices
- Integrated **Lucide** icons for clean, consistent UI elements and **Geist fonts** for typography
- Implemented dynamic product/service sections to highlight the company's four core business areas

Skills

Frontend Development — Proficient

- React.js
- Next.js
- Vue.js
- Responsive UI development

Backend Development — Proficient

- Node.js
- Express.js
- PostgreSQL
- Firebase
- Telegram Bot API
- django
